Outdoor Protective Windbrakes

PROTECTIVE WINDBRAKES

OPEN/CLOSED

According to your needs, we construct an **innovative system of windbreaker protection** for professional spaces, in the form of aluminum divider frames, **changeable in height.**

BENEFITS

- > **Construction from aluminum profile**
for exceptional endurance throughout time and bad weather conditions
- > **Crystal 3x3 laminate**
for high security and protection against strong winds
- > **Height fluctuation from 0.90m to 2.20m**
capable to stop wherever the user wants
- > **Easy to open and close even**
with the use of a finger
- > **There is no need to be screwed on the ground**
since they can be placed in a flower box by giving an illusion of its extension
- > **Electrostatic paint with RAL type colour of your choice**
which ensures the prevention against oxidation and deterioration
- > **The length of the protective windshield can be altered per centimeter**
permitting its ultimate adjustment in the proportions of your space

Triple Air Block System

TRIPLE AIR BLOCK SYSTEM

Triple power-operated glass NEW

An innovative system of window breaker protection in the form of **three fold electric windbrakes.**

The protective windbrakes are constructed in all their metal sides by **aluminum profile** as well as they are **electrostatic painted** in **RAL type** colour so as to prevent ultimately the appearance of oxidation and the normal deterioraton to be extended as long as it gets.

Crystal glass laminate 4+4mm is placed in the system, which combines both **high security** and **protection** even from the most strong winds and the esthetic quality and warmth of your outdoor space.

All windshields include an electric engine of the brand **Somfy**.
